On November 11, 2002, new DOA mainframe password restrictions will be implemented by the Office of Computing Services (OCS) that will require passwords to be a minimum of six (6) characters that include at least one alpha (A-Z) or national (#, \$, @) and one numeric (0-9) character.

All AFS/AGPS/CFMS users will be affected by this change. The new restrictions must be met as existing passwords are changed or new passwords established on or after the implementation date.
